

Product Presentation 2025

✦ A Compact Team of Crypto-Native Professionals.

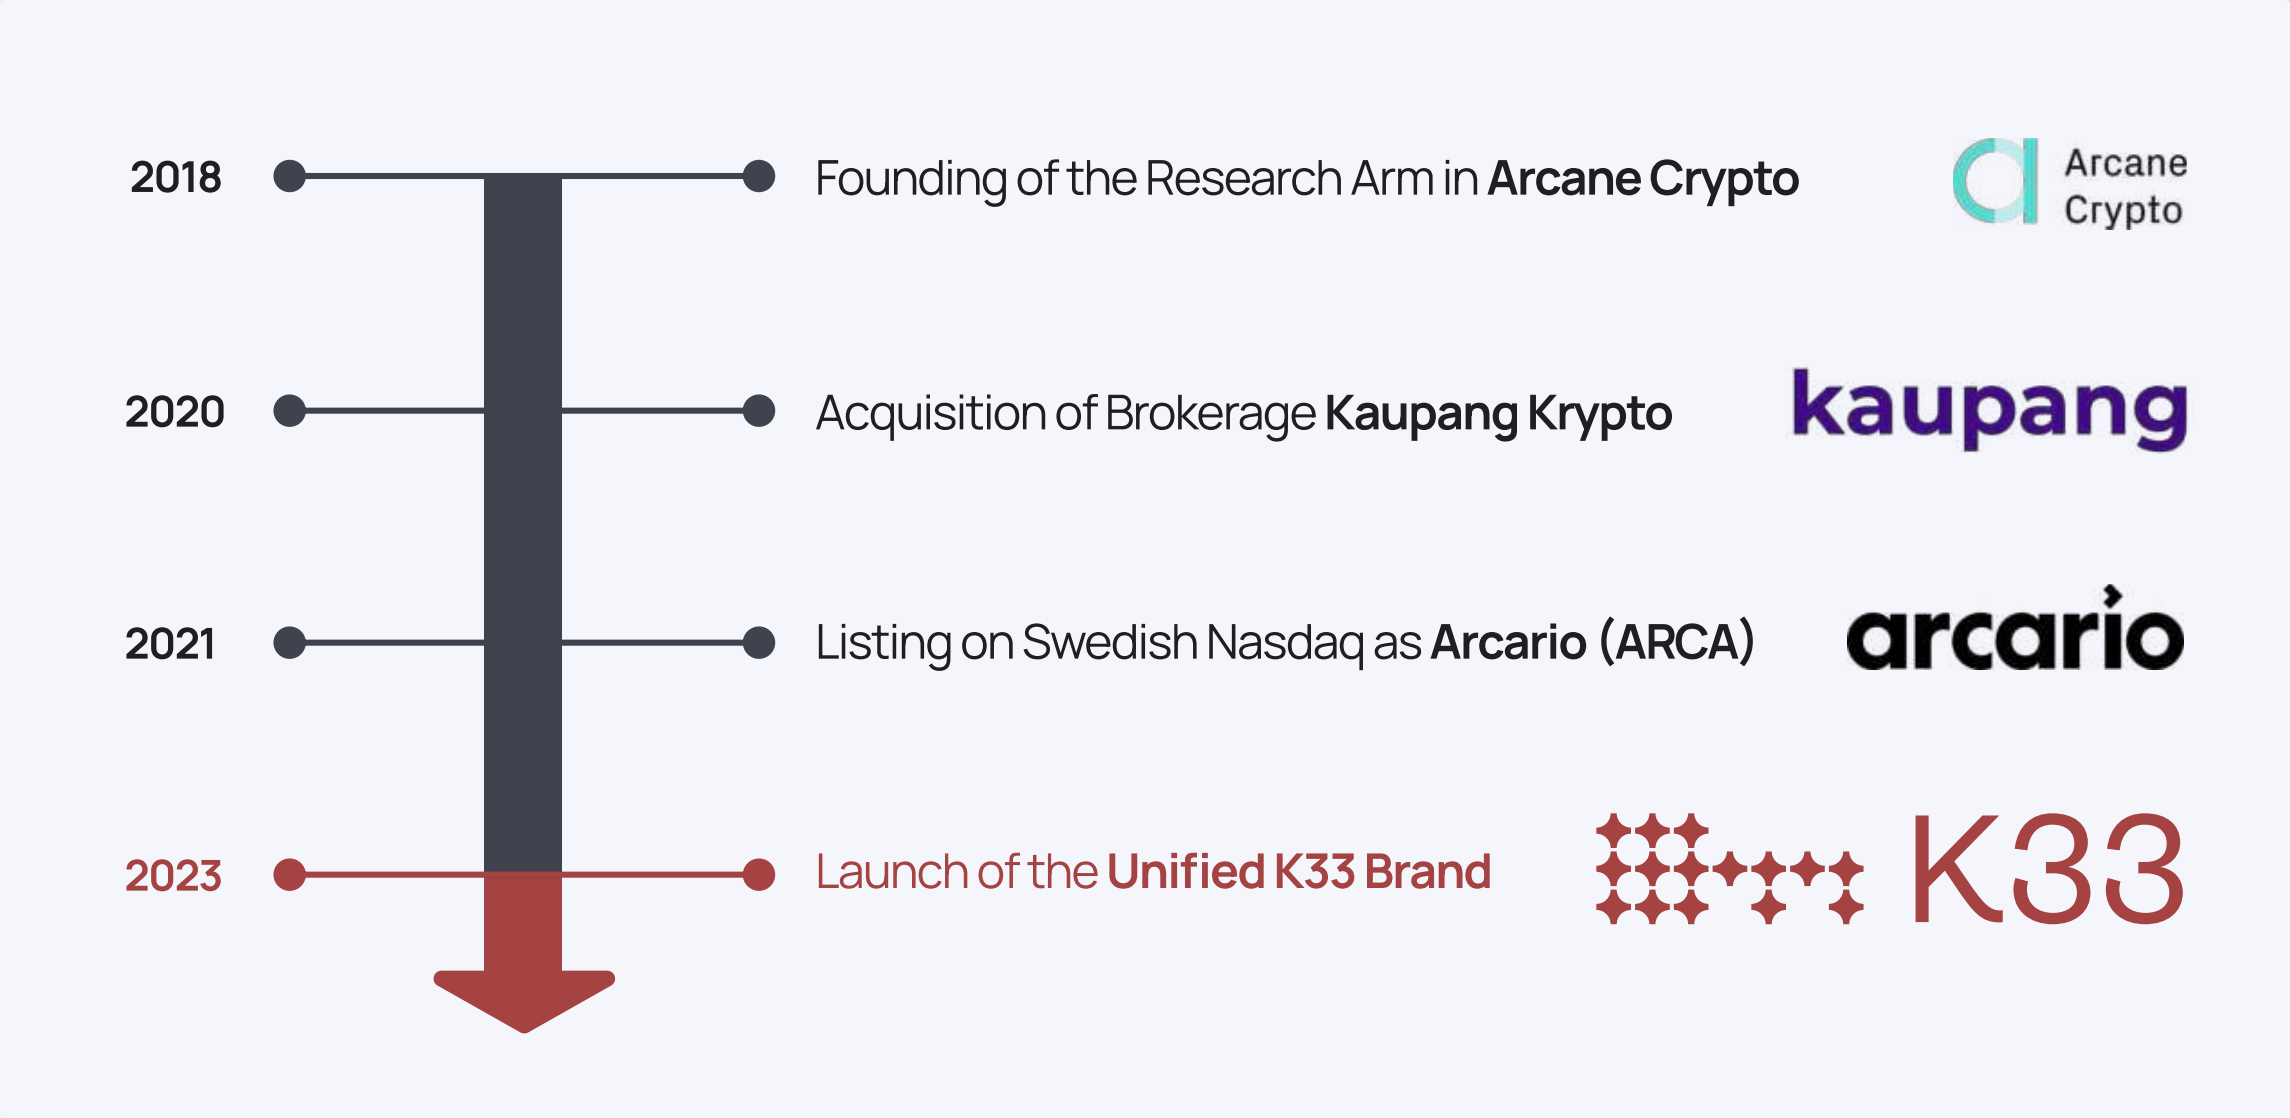

Torbjørn Bull Jenssen, CEO

Our founder and CEO Torbjørn Bull Jenssen has provided his expertise on digital assets to the Norwegian Central Bank, the Norwegian Ministry of Finance, and the Norwegian Financial Supervisory Authority. Torbjørn has been a vocal supporter of Bitcoin since 2013, when he authored his master's thesis at the University of Oslo.

Custody Infrastructure

Software Solution Partner

✦ Why We're Better Than An Exchange.

Instant Execution

Secure your trade immediately by accepting the offered quote.

Avoid the hassle of analysing order books, facing adversarial market makers, and risking partial executions.

Superior Pricing*

Profit from **zero deposit, withdrawal, and trading fees.**

Our pricing is directly included in the quoted **Bid/Ask spread**, so you are not charged in any other way.

Deep Liquidity

Get access to **far superior liquidity** than any of the Nordic exchanges.

Our setup as a brokerage allows us to offer **minimal slippage** for small and large orders alike.

Secure Custody

Maintain **peace of mind** with our institutional-grade custody setup for all funds you are storing with us.

Your funds can **never leave** your account **without your consent.**

Direct Bank Transfers

Seamlessly deposit and withdraw **NOK, SEK, DKK, EUR, GBP, CHF, USD** to and from our Norwegian bank account.

There are **no transaction limits** for depositing, trading, nor for withdrawing.

Fast Customer Support

Benefit from our team's high availability and **rapid response time** when you need assistance.

No automated chatbots and no call center waiting queues.

*You can monitor and compare our Bid/Ask Spreads for trading in NOK in real-time on www.kryptopris.no.

Custody

k33.com

✦ Segregated Vaults for Your Long-Term Cryptocurrency Holdings.

- Leave the **Complexities of Cryptocurrency Storage** to us
- Define **Customizable Withdrawal Rules** tailored to your personal needs
- Receive **Monthly Balance and Transaction Statements** for Effortless Tax Reporting
- Monitor Your Assets on your personal **Vault Dashboard**
- Enable **Transaction Alerts** for your Individual Blockchain Addresses

Exclusive Benefits with our Vault Service	Trading Account	Vault Service

Assistance for Inheritance Planning and Rules	☐	☒
Dedicated Custody Manager and Direct VIP Support	☐	☒
Monthly Balance and Transaction Statements for Tax Reporting	☐	☒
Service Fee (99 USD per month)	☐	☒

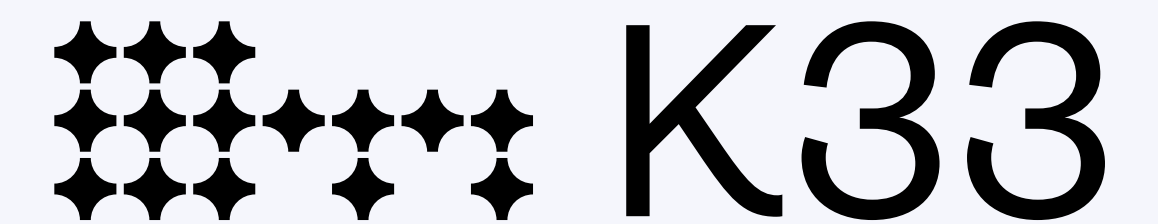

✦ Three Layers of Protection for Your Holdings.

K33 safeguards your private keys by dividing and storing them across various secret locations, ensuring that only **K33** can authorize transactions involving customer funds. **K33**'s Transaction Authorization Policy ensures transactions can only take place after the required approval quota from a designated subgroup of employees is met, authenticating that a valid withdrawal request lies at hand.

Transactions are managed using the **Fireblocks** custody infrastructure (<https://www.fireblocks.com/>), without broadcasting your private keys. **Fireblocks** is the industry's most thoroughly audited and pen-tested platform for managing on-chain transactions. Their coverage includes professional liability insurance for errors and emissions (E&O) regarding assets in both storage and during transfer.

As an additional safety net, we use **CoinCover** (<https://www.coincover.com/>) to protect our clients' assets. **Coincover** is a Disaster Recovery Mechanism for extreme events and mitigates a range of additional risks associated with blockchain assets in unexpected scenarios (lost access, cyber threats, operational failure, technology failure).

Given that your assets are held on separate individual blockchain addresses, you can continuously monitor any transactions related to them using respective Blockexplorers, and even create alerts, for example using services like **QuickNode**: <https://www.quicknode.com/quickalerts>.

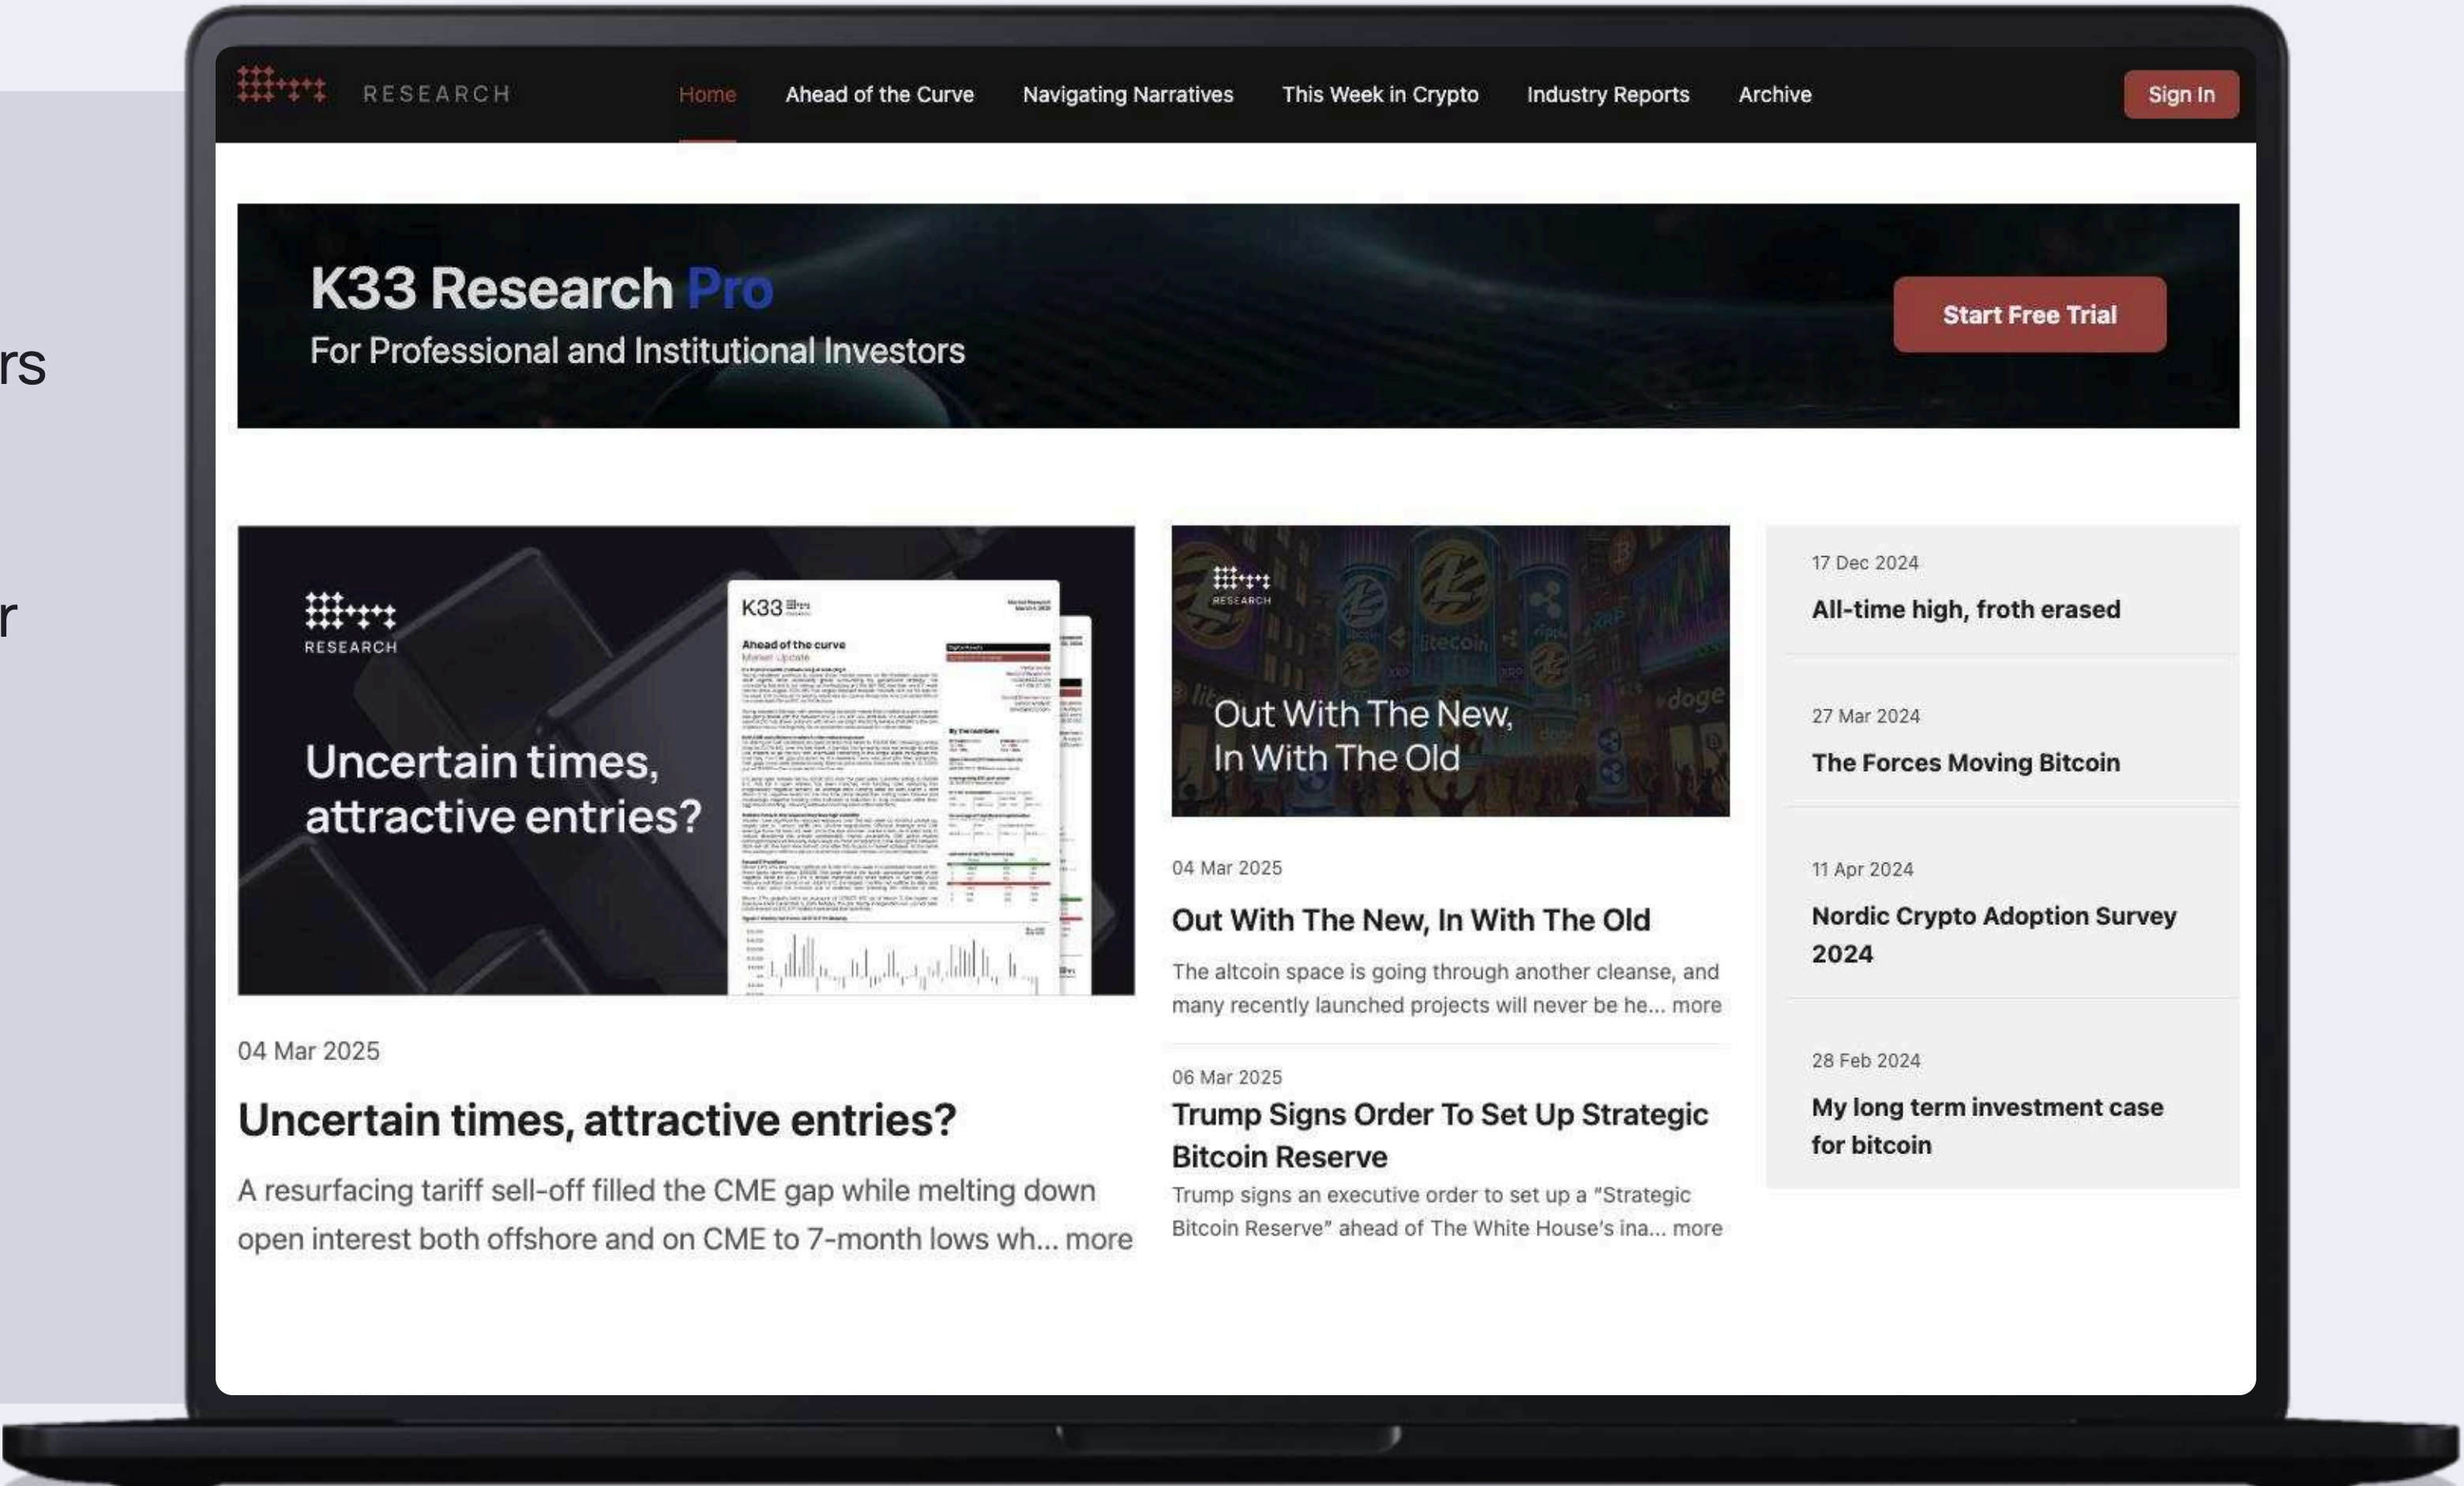

Research

k33.com

✦ Access Our Professional Research Platform.

- Get Access to our Institutional-Grade Research, frequently covered by the likes of Bloomberg, Financial Times, and Reuters
- Benefit from Actionable Insights, and decode Complex Market Signals with our Clear, Insightful Analyses
- Receive Experienced Guidance when navigating crypto markets, and Discover Upcoming Gems in the Altcoin Universe
